AVENTURA LAUNCHES ITS DATUM SERIES OF H.264 IP CAMERAS

Hauppauge, New York, April 5, 2008—**Aventura Technologies, Inc.**, the industry leader in advanced digital video recording technology is debuting its' line of H.264 IP cameras at the upcoming IFSEC trade show in Birmingham, United Kingdom.

The new lineup consists of both analog and megapixel IP cameras in a variety of housing styles both in CMOS and CCD sensors. Aventura utilizes the same H.264 compression technology that it pioneered in the CCTV industry more than 5 years ago. Aventura provides an industry first open standard architecture H.264 for rapid deployment with third party NVR platforms.

Frances Cabasso, Aventura CEO said, "Our new line of H.264 cameras feature the latest high performance Texas Instruments digital signal processors. While we feel the IP camera market is still technologically in its infancy we felt we had a niche to fill. The Aventura product offering consists of a good cross section of the most popular type cameras for the most common applications"

Ms. Cabasso further stated, "Our breath of product shall expand in the future with moving intelligence and storage out to the edge and creating advanced applications to work in an enterprise environment. The challenge and hurdles in the IP camera networking space still are bandwidth, latency, redundancy and management concerns."

Frances concluded, "While we are confident there is a future for IP cameras we would not quickly profess the death of analog. There are still many limitations that IP will always have and we see the principal advantages of IP cameras as being in the megapixel space where the ultimate in quality is required. For the most part high resolution cameras in controlled spaces will accomplish the task at significantly lower costs and more reliably."

About Aventura Technologies, Inc.

Aventura Technologies, Inc. is a New York based designer, developer, manufacturer and integrator of cutting-edge PC-based digital video surveillance solutions for business, government and gaming. All of the Company's solutions are remotely manageable via the Internet, Intranet, or any other network connection. Aventura's suite of products form end-to-end security solutions.

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such statements are based on the current expectations of the management of Aventura Technologies, Inc. (the "Company") only, and are subject to a number of risk factors and uncertainties, including but not limited to changes in technology and market requirements, decline in demand for the Company's products, inability to timely develop and introduce new technologies, products and applications, difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel, loss of market share, pressure on pricing resulting from competition, and inability to maintain certain marketing and distribution arrangements, which could cause the actual results or performance of the Company to differ materially from those describe therein. All statements contained herein that are clearly historical in nature are forward-looking and the words "anticipate," "believe,"

“expect,” “estimate,” “project,” and similar expressions are generally intended to identify forward-looking statements. The Company undertakes no obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
