AVENTURA LAUNCHES DVR/NVR VERSION 6.0 THE WORLD'S MOST ROBUST ENTERPRISE VIDEO MANAGEMENT PLATFORM

Hauppauge, New York, December 19, 2008—**Aventura Technologies, Inc.**, the industry leader in advanced digital video recording technology announced today the release of its all new enterprise video management platform.

The new version 6.0 takes video management to a whole new level. The backbone and architecture of the new software brings all security disciplines into a single easy-to-use interface.

Frances Cabasso, Aventura CEO said, “Aventura Technologies has always been known as the innovator in the video recording space. Aventura pioneered the H.264 platform for the surveillance industry more than 5 years ago, while others are first discovering its benefits. We have recognized the need for a centralized solution that can address disparate security systems, with disparate characteristics. The CCTV industry has been plagued by manufacturers that don’t like to play nice. Everything is one proprietary system after another, which frustrates the end user who wants to have a single interface to manage their operations.”

Ms. Cabasso further stated, “Version 6.0 was 2 years and teams of software and hardware engineering in the making. The platform has a few basic concepts. Create an architecture that can address the most common off the shelf legacy products and futureproof.”

Cabasso added, “Some of the unique features of 6.0 are:

- Ability to support both analog and IP cameras on a single platform natively
- Ability to hardware decode both analog and IP streams both at the client and server levels
- Ability to communicate seamlessly with 3rd party DVRs and NVRs
- Ability to interface with third party devices (access control, POS, etc.)
- Built-in advanced video analytics
- Interoperates with Aventura mobile and non-pc based DVR/NVR products
- High-Definition quality video and audio fully synchronized up to 64 channels
- Quad monitor display system (live, playback, alarm, eMap)
- Advanced virtual hardware matrix switching (decode IP and analog streams)
- Software API for third-party integration
- Custom hardware and software development to meet customer needs”

Ms. Cabasso concluded, “Aventura’s new software platform is simply the best-in-class. Before a line of code was written, extensive communications took place with systems integrators and large and small end users listening to their frustrations and recommendations. It has been a continuing work in progress and new features sets will be added quarterly based upon customer input. The software in conjunction with some of the new camera and transmission products coming out of the Aventura laboratories creates the security platform of the future.”

About Aventura Technologies, Inc.

Aventura Technologies, Inc. is a New York based designer, developer, manufacturer and integrator of cutting-edge PC-based digital video surveillance solutions for business, government and gaming. All of the Company's solutions are remotely manageable via the Internet, Intranet, or any other network connection. Aventura's suite of products form end-to-end security solutions.

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such statements are based on the current expectations of the management of Aventura Technologies, Inc. (the "Company") only, and are subject to a number of risk factors and uncertainties, including but not limited to changes in technology and market requirements, decline in demand for the Company's products, inability to timely develop and introduce new technologies, products and applications, difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel, loss of market share, pressure on pricing resulting from competition, and inability to maintain certain marketing and distribution arrangements, which could cause the actual results or performance of the Company to differ materially from those describe therein. All statements contained herein that are clearly historical in nature are forward-looking and the words "anticipate," "believe," "expect," "estimate," "project," and similar expressions are generally intended to identify forward-looking statements. The Company undertakes no obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
