AVENTURA INTRODUCES AFFORDABLY PRICED DIGITAL FIBER PRODUCTS

Hauppauge, New York, June 21, 2008—Aventura Technologies, Inc., the industry leader in advanced digital video recording technology has introduced a line of digital fiber transmitters, receivers and media converters aggressively priced offering integrators a cost effective solution for long distance transmission of video, audio and data.

The new fiber series under the brand name CCTVfiber.com© features free standing or rackmountable 1,4, 8 and 16 channel units available in singlemode and multimode with 10-bit digital transmission.

Frances Cabasso, Aventura CEO said, “The benefits of transmitting video over long distances via fiber have been well known. The issue has always been trying to justify the cost. As a shortcut many have opted for the low cost AM transmission products. The problem is AM has issues with distortion, is not immune to noise and is not constant, predictable or repeatable.”

Frances added, “Our philosophy in addressing the fiber market was engineering a product with true broadcast quality and performance which is priced below AM products. Therefore, you are giving the customer the best of quality, removing the unknowns associated with AM and justifying the expenditure.”

Cabasso concluded, “We have launched with a compliment of products that are the staples of the industry in both the video and Ethernet arenas. But we have also made it clear to our clientele that we can customize to suit their needs. Whether it’s disparate number of channels of audio, video and data or different types of connectors we are here to provide what the customer requires. Aventura will be expanding the product line into combinations of the fiber into other Aventura product offerings such as cameras, encoders, dvr’s, etc.”

About Aventura Technologies, Inc.

Aventura Technologies, Inc. is a New York based designer, developer, manufacturer and integrator of cutting-edge PC-based digital video surveillance solutions for business, government and gaming. All of the Company’s solutions are remotely manageable via the Internet, Intranet, or any other network connection. Aventura’s suite of products form end-to-end security solutions.

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such statements are based on the current expectations of the management of Aventura Technologies, Inc. (the “Company”) only, and are subject to a number of risk factors and uncertainties, including but not limited to changes in technology and market requirements, decline in demand for the Company’s products, inability to timely develop and introduce new technologies, products and applications, difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel, loss of market share, pressure on pricing resulting from competition, and inability to maintain certain marketing and distribution arrangements, which could cause the actual results or performance of the Company to differ materially from those describe therein. All statements contained herein that are clearly historical in nature are forward-looking and the words “anticipate,” “believe,”

“expect,” “estimate,” “project,” and similar expressions are generally intended to identify forward-looking statements. The Company undertakes no obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
