AVENTURA INTEGRATES INTELEX AND C-CURE INTO ITS DVR/NVR PLATFORM

Hauppauge, New York, February 9, 2008—**Aventura Technologies, Inc.**, announces today the integration of American Dynamic's Intelix DVR and C-Cure Access Control platform into the Aventura DVR and NVR platforms.

The integration allows purchasers of Aventura DVRs to communicate seamlessly with the AD products on a common interface. Users can call up live and playback video from the Intelix DVR as well as allow video call up on the C-Cure access control software. The access control portion allows C-Cure users to call up video on alarm as well as vice versa the Aventura system displaying video with the corresponding alarm data on the Aventura interface. All the functionality can be managed on the Aventura Graphical User Interface.

Frances Cabasso, Aventura's Chief Executive Officer said, "C-Cure is the first of many access control software platforms we intend to work with. Aventura products are well entrenched in the federal government sector where C-Cure also seems to be predominant in its respective category. It just seemed like a natural as a first step into a centralized platform, which unifies different cross sections of the security market."

Cabasso further added, "As time progresses we will expand the functionality available for control of third party devices based upon customer demands. Aventura is clearly focused on listening to the customer. Learning what works in their world and why are paramount. Sell them something they can use and build upon and remove the barriers that make many systems cumbersome and unusable. The trick is giving them the maximum functionality but at the same time realize it is an operator using the system not an engineer or programmer."

About Aventura Technologies, Inc.

Aventura Technologies, Inc. is a New York based designer, developer, manufacturer and integrator of cutting-edge PC-based digital video surveillance solutions for business, government and gaming. All of the Company's solutions are remotely manageable via the Internet, Intranet, or any other network connection. Aventura's suite of products form end-to-end security solutions.

This press release contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. Such statements are based on the current expectations of the management of Aventura Technologies, Inc. (the "Company") only, and are subject to a number of risk factors and uncertainties, including but not limited to changes in technology and market requirements, decline in demand for the Company's products, inability to timely develop and introduce new technologies, products and applications, difficulties or delays in absorbing and integrating acquired operations, products, technologies and personnel, loss of market share, pressure on pricing resulting from competition, and inability to maintain certain marketing and distribution arrangements, which could cause the actual results or performance of the Company to differ materially from those describe therein. All statements contained herein that are clearly historical in nature are forward-looking and the words "anticipate," "believe,"

“expect,” “estimate,” “project,” and similar expressions are generally intended to identify forward-looking statements. The Company undertakes no obligation to (and expressly disclaims any obligation to) update or alter its forward-looking statements whether as a result of new information, future events or otherwise.
